SAMUEL ART GLASS

Hand Blown Art Installations and Illuminations

Samuel Art Glass Designer Line

This limited edition series of production pieces by Pacific Northwest glass artist Samuel Decker is his first annual “Designer Line.”

“Samuel Art Glass specializes in unique brilliant hand blown glass art installations and illuminations.”

Glass artist Samuel Decker creates elegant yet bold custom art pieces for high-end residential as well as restaurant, hotel, retail, office and other commercial spaces. He specializes in large-scale ceiling and wall-hung works and floor standing sculptures. Plus he creates amazing residential chandeliers and other lighting fixtures.

For the first time, Samuel has created a “Designer Line” of smaller home décor pieces which he is offering to resellers. This first series is for the 2011-2012 season and a new series will be introduced each year. Each piece is hand-made thus each one is slightly different and a unique piece of art that will be cherished by its owner and it will increase in value over time.

~~~

The 2012 collection consists of 9 designs, most of which are classic form vases and vessels with bold colors and some subtle variations. Two of the vessel designs depart from the classic by adding a unique twist. In addition to the vases and vessels, this year marks the beginning of Samuel’s Collector Series - a new *Objet d’Art* will be created each year. Likewise each year will feature a new Tribute Sculpture - intended for awards or other special gifts. Each year a generous percentage of the proceeds from the sale of the tribute sculpture will go to a different worthy cause.

# About Us

Glass artist, Samuel Decker is a rising star among the new generation of glass artists who have grown out of the Pacific Northwest studio glass renaissance started forty years ago by the Pilchuck Glass School near Seattle.

Samuel's technique is a combination of the old world Italian traditions and the newer movement of the modern Northwest glass culture. He was on the glass blowing team with Dale Chihuly in Seattle from 1998 to 2007. He has blown glass in Finland and Murano and has worked with many world renowned artists. After working on Chihuly's production team for so many years, Samuel excelled with his natural intuition, technical skills and artistic eye. He learned to manipulate very large glass pieces and to create even larger works by combining multiple pieces with metal fixtures, while capturing the true beauty of the natural elements in each piece.

Samuel started Shantitown Glassworks in 2003, then Samuel Art Glass, LLC in 2007, and he recently opened his new, much larger studio called "The Hot Shop Art Glass Studio" in Eugene, in order to meet the needs of the growing demand for his artwork.

Artist's Statement: "My objective for this first year was to create mostly elegant, timeless pieces along with a few modern pieces. The classic style pieces will fit in with any décor and will remain stylish in any home for generations. Interior designers appointing beautiful homes will appreciate this addition to their portfolios. I feel that my approach – creating new limited edition works each year – should be very attractive to galleries and décor shops as well. You can be assured of getting fresh new creations each year, and yet you will be able to reorder and special order items for your customers and have consistency throughout each production run."

Please visit our website where you can view many of his other works and watch a video of Samuel at work. If you would like to make arrangements to tour his studio please contact us.
